

habitat.

A company from Ukraine is looking for potential partners in Lithuania:

- Design agencies
- Marketing agencies
- Startups
- Manufacturing companies in need of design services

The company is also open to collaborating with other companies in the same field to exchange or gain know-how.

About Us Habitat Design Agency is a data-driven digital design agency that operates as an in-house team for businesses. We specialize in product design, website development, brand identity creation, and motion design. Over the past six years, we have collaborated with companies such as AngelList, Louis Vuitton, SPAR, Hopin, StreamYard, and Quicargo.

Our Services

- **Product Design** – UX/UI design, design systems, user research, and prototyping.
- **Website Design** – Marketing and e-commerce website development.
- **Brand Identity** – Logo design, brand guidelines, and marketing materials.
- **Motion Design** – Promotional videos, explainer animations, and brand animations.

Why Choose Us? ✓ A reliable and experienced team (18 specialists) ✓ High-quality design solutions ✓ 5.0 average client rating (Clutch platform) ✓ Efficient communication and innovative solutions

Our Team Habitat Design Agency brings together talented professionals focused on innovation and close collaboration with clients. The agency is led by Design Director **Viktoras Samokhvalovas** and Managing Director **Helena Prokopovych**.

Values & Approach

- **Data-Driven Design** – Decisions based on user research and analytics.
- **Close Client Collaboration** – We function as an internal design team, providing flexibility and ongoing support.
- **Aesthetics & Functionality** – We aim to create designs that are not only visually appealing but also strategically effective.

LLC INNOVINNPROM

Leaders in Automation for the Grain Industry

A company from Ukraine is looking for companies in Lithuania to offer its automation services. They are also interested in partnering with companies in a similar field to exchange know-how.

ABOUT US

Founded in 1990, **LLC INNOVINNPROM** specializes in automation solutions for the bakery and grain industries. With decades of experience, we have successfully implemented automated control and management systems across mills, grain elevators, and port grain terminals. Our expertise spans from designing and delivering imported equipment to installation, software development, and commissioning.

Our latest innovations include **automated grain sampling systems** for vehicles and hopper cars, with a vision of transitioning towards **fully autonomous grain sampling robots**, eliminating human intervention in grain analysis.

Key Achievements:

- Automation of **20 mills** and multiple feed mills.
- Over **60 grain elevators and port grain terminals automated**.
- Installation of **23 vehicle and 2 railcar grain samplers**.
- Implementation of various monitoring and control systems (thermometric, strain gauge, humidity control, and more).

OUR PRODUCTS

We offer a wide range of **industrial automation systems** for the grain storage and processing industry:

- **Industrial Control Systems (ICS)** for mills, grain elevators, and feed mills.
- **Remote monitoring systems** for technological processes and temperature control.
- **Weighing and dosing systems** for bulk materials and grain.
- **Automated grain sampling systems** for vehicles and railcars.
- **SAKURA** – an informational software system tailored for grain enterprises.
- Custom **electronic devices and software development**.

OUR SERVICES

We provide end-to-end automation solutions, including:

- **Engineering & Project Design** – Development of new systems and modernization of existing production.
- **Software Development & Integration** – Custom automation software tailored to industry needs.

- **Installation & Commissioning** – Setup of cable networks, automation equipment, and electric enclosures.
- **Manufacturing & Installation** – Grounding, lightning protection, and lighting systems.
- **Training & Support** – Certification and post-warranty service for installed systems.

ENGINEERING EXPERTISE

Our engineering team designs smart automation solutions that comply with all industry standards. Our expertise includes:

- **ICS Planning & Design** – Development of automation schemes, sensor selection, and electric circuit design.
- **Industrial Network Engineering** – Single-line electrical circuits, board and cable layout plans.
- **Custom Automation Solutions** – Development of non-standard automation systems and custom-built electronic equipment.

WHY CHOOSE US?

- ✓ 30+ years of expertise in automation for the grain industry.
- ✓ Proven track record with 100+ successful implementations.
- ✓ Cutting-edge innovation in automated grain sampling systems.
- ✓ End-to-end service: from design to implementation and support.

Contact us to automate your grain storage and processing operations today!

The company is expanding its product range and seeking distributors for its new craft beer aged for one month and dry breakfast cereals with filling. It is also looking for partners interested in sourcing various food sauces, such as mustard, ketchup, and similar products.

About Us Founded in 1999, **VHS Vinnytsia** is a family-owned company specializing in the production of mustard, horseradish, dry snacks, and beverages. Led by **Lubov Semeniuk**, the main stockholder and chairman of the board, the company has established itself as a key player in Ukraine's food industry. With a workforce of **118 highly qualified employees** and compliance with **FSSC 22000, ISO 9001, and ISO 22000** standards, VHS Vinnytsia guarantees top-quality products at competitive prices.

Our Services

- **Private Label Manufacturing** – Over 10 successful projects in partnership with leading retail chains in Ukraine and abroad.
- **Product Development** – In-house R&D team and laboratory for quality control and new product innovation.
- **Flexible Packaging Options** – Glass jars (125g - 1kg), plastic buckets (1kg - 5kg), and customized packaging.
- **Sustainable Practices** – Solar-powered operations, efficient waste disposal, and raw material sourcing from local farmers.

Our Products

- **Mustard & Horseradish** – Wide selection of traditional, organic, and flavored varieties, including Dijon mustard and horseradish-based sauces.
- **Beverages** – Kvass, lemonade, and other fermented drinks.
- **Dry Snacks & Breakfast Cereals** – Corn sticks and filled dry snacks, perfect for various market needs.

Why Choose VHS Vinnytsia? ✓ **Expertise & Experience** – Over two decades of successful food manufacturing. ✓ **Strict Quality Control** – Certified under **FSSC 22000, ISO 9001, ISO 22000** food safety standards. ✓ **Sustainable Operations** – Solar power installations and waste reduction initiatives. ✓ **Reliable Supply Chain** – Strong partnerships with national and international retailers. ✓ **Custom Recipe Development** – Ability to tailor flavors, packaging, and production to customer needs.

Vytvyrnia Farm

Vytvyrnia Farm is dedicated to providing processing services and developing innovative products for small farmers and producers of fruit and berry products. The farm's production facilities are equipped to manufacture a range of products, including apple juice, fruit and vegetable chips, cider, calvados, and energy bars. Additionally, Vytvyrnia is currently developing technology to produce eco-friendly cups made from apple processing waste combined with starch. The farm is also exploring the possibility of producing apple vinegar.

Vytvyrnia Farm is actively seeking partners to collaborate on the development, production, and promotion of innovative fruit and vegetable processing products in both domestic and international markets.

X Module – Quality Modular Buildings Made in Ukraine

Overview

X Module is a Ukrainian company specializing in the design and production of high-quality modular buildings. With a modernized manufacturing facility, the company provides reliable and comfortable living solutions for various applications, including residential, administrative, and specialized structures.

Modern Production & Quality Assurance

- **In-House Manufacturing:**
X Module operates its own production line, ensuring direct-from-manufacturer pricing, a loyal pricing policy, and strict quality control at every stage of manufacturing.
- **Advanced Technologies:**
The company's team of designers and engineers continuously integrates modern technologies and innovative practices, guaranteeing high-quality materials, advanced insulation solutions, and efficient air conditioning.
- **Commitment to Reliability:**
With over seven years of industry experience, X Module upholds a strict no-compromise approach to quality, providing durable modular buildings with a 10-year warranty.

Why Choose X Module?

- **Customer-Centric Approach:**
The company values every client and offers tailored solutions, ensuring fast order execution and flexibility to meet unique requirements.
- **Value & Integrity:**
As a direct manufacturer, X Module eliminates intermediaries, maintaining fair pricing without sacrificing quality.
- **Resilience & Vision:**
Despite operating in a frontline region, the company has successfully maintained safe working conditions and continued production, reflecting its strong belief in Ukraine's future as a peaceful and prosperous nation.

Commitment to Excellence

X Module takes pride in its work, embodying quality, reliability, and an unwavering dedication to customer satisfaction. The company's philosophy emphasizes the importance of self-reliance and Ukrainian-made excellence.

ProLine Yacht Design & Engineering

The company also has experience in the field of **drones** and is looking for parts for their production. In addition, the company is interested in working with those who offer **anti-aircraft defense (AAD)** systems.

About Us Established in 2003, **ProLine** is a leading Ukrainian project and design bureau specializing in the design and development of yachts, recreational vessels, passenger ships, and technical fleet vessels. With a comprehensive approach, we manage projects from initial concept through construction and operational support, ensuring innovative and efficient solutions in shipbuilding.

Our Services

- **Yacht Design:** Creation of bespoke motor and sailing yachts tailored to client specifications, focusing on aesthetics, performance, and comfort.
- **Passenger Vessel Design:** Development of safe and efficient passenger ships, including ferries and cruise vessels, designed for optimal passenger experience.
- **Technical Fleet Design:** Engineering of specialized vessels such as pilot boats, workboats, and service ships, emphasizing functionality and durability.
- **Project Management:** Comprehensive project oversight from advanced planning stages to construction supervision and operational support.

Why Choose ProLine?

- **Experience and Expertise:** Over two decades of industry experience with a portfolio of diverse and successful projects.
- **Innovative Solutions:** Utilization of cutting-edge technologies and design methodologies to deliver state-of-the-art vessels.
- **Client-Centric Approach:** Tailored services that meet the unique needs and expectations of each client.
- **Quality Assurance:** Commitment to the highest standards of quality, safety, and environmental sustainability.

raw: materials lab is a Ukrainian R&D company that explores the impact of the global economy on the environment. We develop and manufacture biodegradable materials and industrial design products. The company was founded in 2022 as a result of more than a decade of experience in architectural practice at INAKSHI architects, as well as due to the availability of local resources—industrial hemp—and our co-participation in establishing the sustainable materials industrial cluster, Resources, in the city of Sumy.

Our key focus areas:

Development and production of hemp-based bioplastics.

Our bioplastic consists of polyester glycerin-citric resin (polyglycerin-citrate), which is currently partially thermosetting, combined with hemp fibers. This material serves as an eco-friendly alternative to sheet materials based on formaldehyde adhesives (particleboard, MDF, plywood, OSB, etc.).

Applications: furniture manufacturing, acoustic systems, automotive or other engineering structures, lighting, packaging, finishing materials.

Index	raw:	MDF	CHIPBOARD	OSB
Flexural strength, mPa	33-39	17-23	10-11	Cep.22
Impact strength, kJ/m ²	10-17		4-8	4-8
Water absorption, %	7,8	35-70	12-88	<15

Application in industrial design. We integrate sustainable material solutions into product design and architectural projects, ensuring their functionality and environmental friendliness.

Development of 3D printing concepts for hempcrete. We are working on developing a 3D printer for hempcrete printing and refining the mixture formulation to enhance its eco-friendliness and durability. **Applications:** manufacturing of acoustic systems, construction blocks, walls, and partitions for buildings.

Development of our own PLA plastic. We have created biodegradable PLA plastic suitable for the production of nonwoven materials. **Applications:** medical clothing, shoe covers, wipes, agro textiles, lighting, etc.

Collaboration opportunities:

1. **Enhancing the formulation of hemp biocomposites and nonwoven building insulation (joint research):** improving fire and water resistance properties.
2. **Developing a formulation for hempcrete for 3D printing (joint research):** acoustic systems, piers, building blocks, packaging, etc.
3. **Support in testing our materials and obtaining certification in the EU.**
4. **Consultations on transitioning to sustainable principles for existing and newly established institutions.**

We are interested in partnerships and collaborations with researchers and investors who share our passion for innovation in sustainable materials.

ABOUT THE COMPANY:

Skloresurs company has 18 years of experience in the field of architectural and interior glazing. The company's mission is state-of-the-art glass processing technologies to make your dreams come true. Look at the world with pleasure! The company employs approximately 250 employees. 2 production sites of 17600 m² in the city of Dubno, Rivne region and the city of Tlumach of Ivano-Frankivsk region. The products are certified by the German Institute of Window Technologies ift rosenheim, the parent company GUALOS has its own fleet, we organize all customs formalities, which allows export.

PRODUCTS:

Double-glazed windows (sun protection, energy-saving, multifunctional, sound-proof, heated, bent, printed, with smart triplex).

Monoglass, or interior glass: triplex, sandblasted processing (artistic matting), enameled glass, curved glass, glass with printing. Usage - office partitions, wall, railings, display cases.

One of the leaders in molds manufacturing and injection molding industry in Ukraine

Company's data

- ❖ est. 1991
- ❖ Number of employees: 20
- ❖ Area: machinery (tooling), metalworking and plastic industry
- ❖ Location: Ternopil, Ukraine

Contacts

Name: Dr. Olga Melykh

Position: CEO

e-Mail: office@kvota.te.ua

Telephone: +380509686360

Website: www.kvota.com.ua

Products and Services

- ❖ Product design and 3D modelling
- ❖ Injection mold manufacturing
- ❖ Production of the finished plastic goods

Our value proposition

- ❖ Complex approach for molds design and manufacturing
- ❖ Own tool shop and manufacturing facilities with modern equipment
- ❖ High quality and short lead time

Cooperation offer

- ❖ Manufacture injection molds for
- ❖ Production of finished plastic goods
- ❖ Manufacturing of the molds for small product series (10,000 or less pcs per month) and prototyping.
