

## Expected results of the project

- ▶ Tailor-made national tandem training programs in the three Baltic countries
- ▶ 800 trained VET and WBL tutors in Latvia, Lithuania, Estonia
- ▶ Joint Baltic competence profile for WBL tutors

## The effects of joint training

- ▶ improved competences of WBL tutors at VET schools and workplaces
- ▶ improved cooperation between VET and companies and encouraging clustering of local SMEs around schools
- ▶ strengthening regional, national and local WBL governance mechanisms

**Baltic regional benchmarking, mutual learning, exchanges in WBL systems contribute to Baltic Apprenticeship Alliance.**

Erasmus+ project "Testing New Approaches to Training VET and Workplace Tutors for Work Based Learning" - TTT4WBL, project No. 582951-EPP-1-2016-2-LV-EPPKA3-PI-POLICY

## EU Erasmus+ KA3 activity project

**TTT4WBL**

**Testing New Approaches to Training VET and Workplace Tutors for Work-Based Learning**

**(February 2017 – January 2020)**

Co-funded by the Erasmus+ Programme of the European Union

The project **innovation is the tandem training approach** with an added value – sharing and co-creation of knowledge based on the expertise of participants with professional background both - from VET institutions and companies.

## Project aims

- ▶ To promote professional development of WBL tutors through EU and regional cooperation and mutual learning
- ▶ To promote stronger cooperation between VET and social partners and SMEs
- ▶ To collect and analyse evidence for implementation of innovative measures and facilitate their transferability

## Objective

To test a professional development model for WBL tutors: Joint training of tutors from VET and tutors from enterprises in 3 Baltic countries – Lithuania, Latvia and Estonia

## Target groups

- ▶ WBL tutors from VET institutions and enterprises
- ▶ Trainers of WBL tutors, VET teacher trainers
- ▶ VET institutions' management
- ▶ Enterprises/employers involved in WBL
- ▶ Public authorities, social partners and stakeholders with role in WBL

## Project activities

**Sample training program.** First the project partners develop and pilot a sample training program for in-company and vocational education and training (VET) institutions' trainers.

**National training programs.** At a later stage each Baltic country develops its own national training program in relation to its national priorities, legal framework and the interests and opinions of involved stakeholders and based on a common agreed Baltic competence profile of a WBL trainer.

**Experimentation methodology.** The project experimentation methodology envisages dividing experimentation into smaller periods of reviews and improvements.

**Development and revision of training approach and methodology.** Both the joint training program and experimentation methodology are built in such a way that the training approach and program is continuously improved on the basis of results and feedbacks in each training activity.

**Research component.** There is a process of piloting and simultaneously improving the program with the help of researchers. The Finnish research institute provides a methodological support based on the analysis of the opinions of involved stakeholders from all the Baltic countries.

## Experimentation cycle
